Professional summary

Frontend Engineer with 8+ years of experience building and evolving digital products in production: enterprise dashboards, financial applications, and an entertainment platform with a very high volume of users. Specialized in React, JavaScript, and TypeScript, with experience in frontend architecture, Design Systems, service integration (REST, GraphQL, WebSockets), web performance, testing, and observability. I have coordinated priorities with teams in Spain and Brazil, conducted code reviews, and supported the technical growth of junior developers.

Professional experience

Frontend Engineer | Caliente Interactive

Dec 2023 – Present

Mexico City, Mexico

Develop and evolve production frontend features for an entertainment platform with a very high volume of users, where stability, performance, and user experience are critical.

- Build responsive, mobile-first interfaces with React and JavaScript on top of a Design System documented in Storybook.
- Integrate real-time services with WebSockets, authentication, state and error handling, and cross-application flows (navigation, URL parameters, and iframes).
- Fixed duplicate WebSocket requests made by multiple components by properly cleaning up React effects, reducing server load and making the interface more stable.
- Optimize renders and track performance with Lighthouse and Core Web Vitals.
- Testing with Vitest, CI/CD with GitHub Actions, error monitoring with Grafana Faro, and local environments with Docker and Laravel services.

Technologies: React · JavaScript · TypeScript · Vite · Bootstrap · Storybook · WebSockets · Vitest · GitHub Actions · Grafana Faro · Docker

Software Engineer (Frontend) | Creditas

Mar 2020 – Aug 2023

Mexico City, Mexico

Developed and evolved financial products in production, combining frontend engineering with TypeScript, observability, product analytics, and technical coordination.

- Built applications with React and TypeScript on Gatsby and Next.js: reusable components, custom hooks, Redux, and REST and GraphQL API integration.
- Progressively migrated products to a shared Design System and aligned the visual experience across Mexico, Spain, and Brazil, using Glamorous and Material Design.
- Developed and maintained up to three production products, with unit tests (Jest, React Testing Library), end-to-end tests (Playwright, Cypress), and performance improvements measured with Lighthouse and Core Web Vitals.
- Built Datadog dashboards for user drop-off and form performance; monitored errors with Datadog and Sentry, tracked events with Google Tag Manager, ran A/B tests with Google Optimize, and analyzed usability with Hotjar.
- Coordinated priorities with teams in Spain and Brazil, conducted code reviews, and mentored junior developers.

Technologies: React · TypeScript · JavaScript · Gatsby · Next.js · Redux · GraphQL · Jest · React Testing Library · Playwright · Cypress · Datadog · Sentry · Google Tag Manager · Hotjar · Netlify

Jr. Front-End Developer | **KarmaPulse** Apr 2018 – Feb 2020

Mexico City, Mexico

Started my career building reusable components from scratch for social listening dashboards and enterprise tools.

- Built reusable components from scratch that were used across multiple dashboards.
- Developed a component library connected to the backend and configurable from Contentful, which the marketing team used to build custom dashboards for each client without depending on developers.
- Built production applications with React, Next.js, Gatsby, Redux, and GraphQL; styled with Glamorous and Tailwind CSS; tested with React Testing Library and measured performance with Lighthouse.
- Error monitoring with Sentry, CI/CD with Jenkins, and first containerized environments with Docker.

Technologies: React · JavaScript · Next.js · Gatsby · Redux · GraphQL · Contentful · Glamorous · Tailwind CSS · Sentry · Jenkins · Docker

Technical skills

Frontend	React · TypeScript · JavaScript · React Hooks · Redux · Next.js · Gatsby · Vite · HTML5 · CSS3
Architecture & UI	Frontend architecture · Design Systems · Storybook · Reusable components · Responsive / Mobile First · Bootstrap · Tailwind CSS · Material Design · Glamorous
Integrations	REST APIs · GraphQL · WebSockets · Authentication · State and error handling
Performance	Lighthouse · Core Web Vitals · Lazy loading · Render optimization
Testing	Jest · React Testing Library · Playwright · Cypress · Vitest
Observability & product	Datadog · Sentry · Grafana Faro · Google Tag Manager · Google Optimize · Hotjar · A/B testing
Delivery	Git · GitHub · GitHub Actions · GitHub Pages · Netlify · Jenkins · Docker
Collaboration	Code review · Mentoring · Scrum · Jira · Confluence · Figma

Education

Bachelor of Engineering in Information and Communication Technologies 2015 – 2017

Instituto Tecnológico Superior del Occidente del Estado de Hidalgo (ITSOEH), Mexico

Languages

Spanish: native · English: intermediate
